Improvements to diathermo-coagulation devices

Alexandre FUKS residing in France (Seine).

Filing date: November 22, 1962 at 2:40 p.m., in Paris

Issued by decision of November 25, 1963.

(Bulletin officiel de la Propriété industriel, No. 1 of 1964.)

(Patent whose issuance was deferred pursuant to article 11, § 7, of the law of July 5, 1844, as amended by the law of April 7, 1902.)

SUMMARY

1. Diathermo-coagulation device comprising, in combination with an oscillator making up the customary source of diathermic current, a means for blocking the operation of said oscillator, characterized by a detection unit adapted to discriminating the coagulation pulses and to delivering, based on these pulses, a triggering signal for said blocking means.
